Hazardous Weather

Hazardous Weather

Severe Storms Potential - Sunday 1 PM - 5 PM

Weather Forecast Office
Amarillo, TX
Issued May 01, 2022 4:32 AM CDT

Thunderstorms are expected to develop this afternoon, favoring the western Panhandles near the dryline in eastern New Mexico.

Severe Storms Potential - Sunday 5 PM - 10 PM

Weather Forecast Office
Amarillo, TX
Issued May 01, 2022 4:43 AM CDT

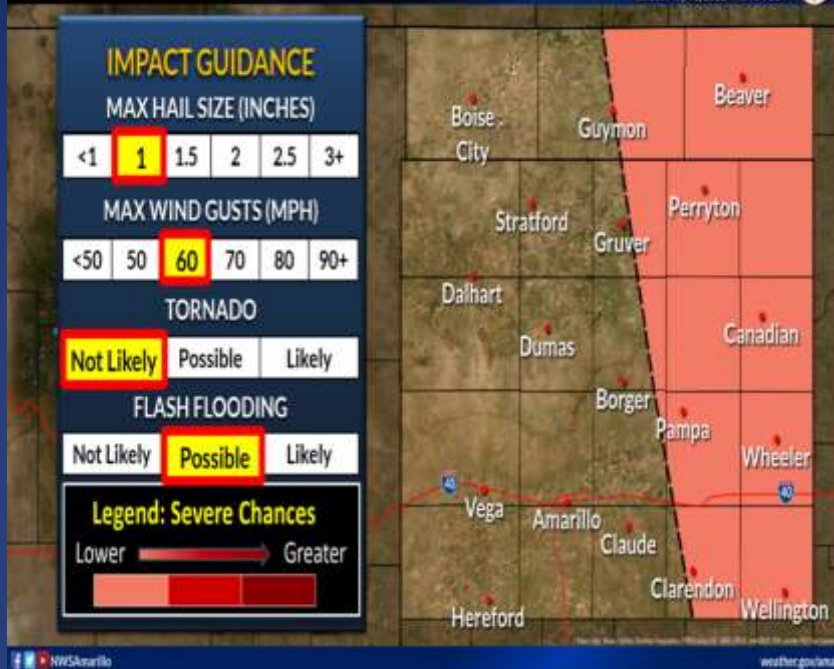

Thunderstorms will move east through the central and portions of the eastern Panhandles. During this time period, a chance of a tornado is the highest along with large hail, damaging winds, and flash flooding.

Hazardous Weather

Severe Storms Potential - Sunday 10 PM - 3 AM Monday

Weather Forecast Office
Amarillo, TX

Issued May 01, 2022 4:45 AM CDT

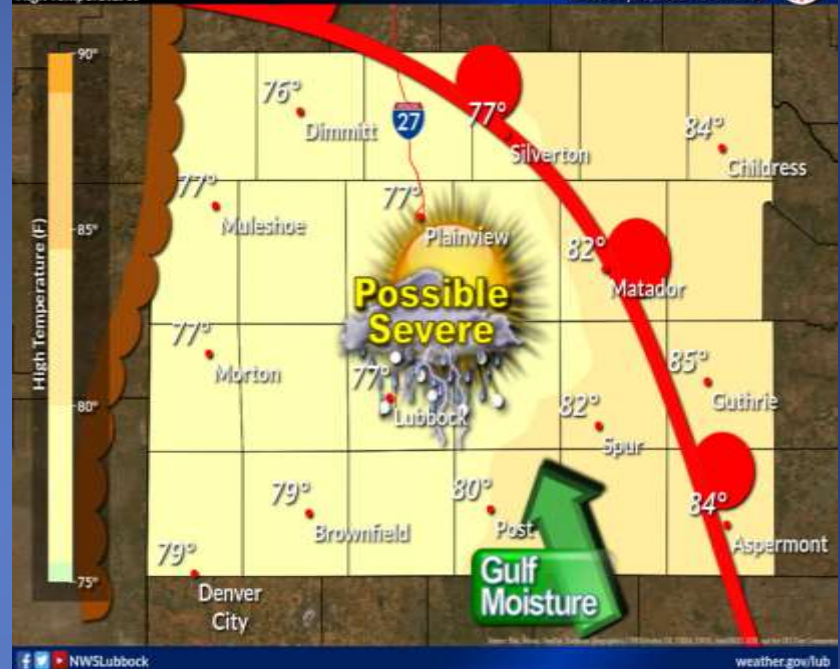

Last of severe storms will move through eastern Panhandles later tonight. Large hail, damaging winds, and flash flooding will be the main threat.

Severe Thunderstorms Possible Today

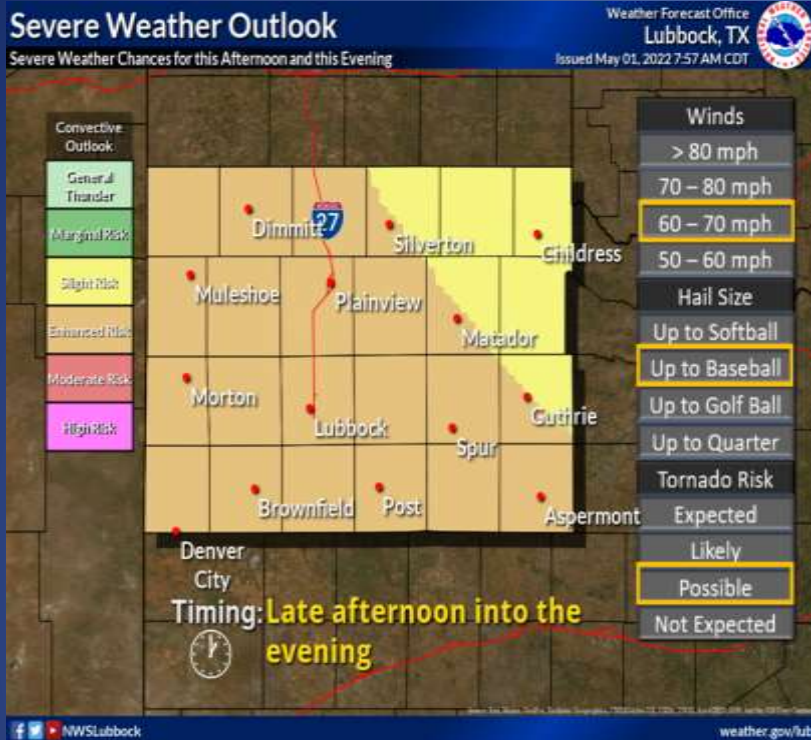

Weather Forecast Office
Lubbock, TX

Issued May 01, 2022 5:19 AM CDT

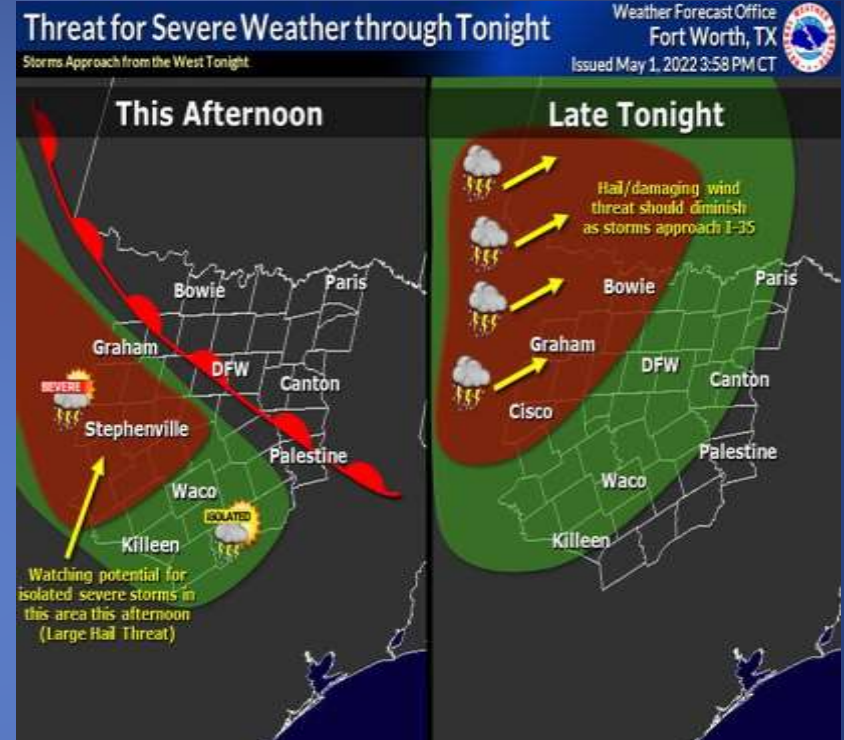

Thunderstorms are expected to form along the dryline near the NM/TX state line and then move east across the region late this afternoon into the evening hours. Some of these storms may be strong to severe. Large hail up to the size of baseballs and wind gusts up to 70 MPH are the primary threat, though a tornado forming can't be ruled out either.

Hazardous Weather

The risk for severe thunderstorms will increase this afternoon and evening. Isolated to scattered severe thunderstorms are expected to develop across the western South Plains and then spread through the remaining South Plains, southern Panhandle and into the Rolling Plains by this evening. These thunderstorms will have potential for very large hail to the size of baseballs, damaging wind gusts near 70 mph, and a few tornadoes. Locally heavy rainfall up to 2 inches will occur with a few of the storms as well.

A warm front will move north through the area this afternoon and there is a low chance for thunderstorms mainly to the southwest of the Metroplex. If any storms can develop in this area, they would likely be severe with a large hail threat. Thunderstorms are expected to develop across West Texas this afternoon and will approach North Texas tonight. Area northwest of the Metroplex have the greatest threat for severe weather. Locally heavy rainfall will also be possible.

Hazardous Weather

Severe Weather Today

Timing: This Afternoon into the Overnight Hours

Weather Forecast Office
San Angelo, TX
Issued May 01, 2022 4:33 AM CDT

Multiple chances for severe weather today:

- Discrete storms forming behind the warm front this afternoon. All hazards will be possible with the main hazard being the potential for large to very large (2+ inch) hail
- Storms forming off the dryline in West Texas and moving east into West Central Texas tonight. All hazards will again be possible with damaging winds and large hail the primary hazards.

Hazardous Weather

There is a marginal to slight risk of severe thunderstorms across the area tonight especially along and west of a Florence to Boerne to Crystal City line. The main severe weather hazards are likely to be large hail and damaging winds. Low potential for tornado. Localized heavy rain possible that could lead to minor flash flooding.

A Red Flag warning is in effect this afternoon and early evening for the Guadalupe and Delaware Mountains, Sacramento Foothills, Chaves and Eddy County plains, and most of Culberson County.
